To whom it may concern:

I have worked for the City of Level Plains as superintendent since 1993. During this time the city has used David Hicks & Associates for all engineering needs including water, sewer, streets, and drainage. Mr. Hicks and company understand the financial strains on a smaller city and have been instrumental in obtaining the maximum amount of grant money available.

The David Hicks & Associates staff is highly qualified in municipal engineering and has always been accessible and willing to help with any question or problem. They have the city's best interest in mind and have been open and honest during my twenty year association with them. I have no reservation in recommending David Hicks & Associates for any engineering services.

Sincerely,

Buddy Wilson
Superintendent
